

Organizing iPhone Home Screen

Move apps around the Home screen, into the Dock, or to other pages

1. Lightly touch and hold any app on the screen until the app icons jiggle. If the apps don't jiggle, make sure you're not pressing too hard.
2. Drag an app to one of the following locations:
 - Another location on the same page
 - The Dock at the bottom of the screen
 - Another page - drag the app to the right edge of the screen. You might need to wait a second for the new page to appear. The dots above the Dock show how many pages you have, and which one you're viewing.
3. Press the Home button to finish or Tap Done (iPhone X and later models)

Creating Folders

You can group your apps in folders to help you find them more easily on the Home screen.

1. Begin the same way - by holding down lightly on an app
2. To create a folder, drag an app onto another app
3. Drag other apps into the folder - you can have multiple pages of apps in a folder.
4. Press the home button to finished or Tap Done
