

iPhone Basics

Front Camera
*Used when on facetime or taking selfies.

Speaker

Battery Percentage

Ring/Silent
*An icon of a bell will pop up on the screen when the switch is turned on/off that will inform you if the ringer is on or off.

Power button
*If you press and hold the button, the screen will go dark and at the top it will say slide to shut down.

Volume Buttons

Home Button
*Pressing this will bring you back to your home page (the screen in the picture above) at any time. It will also wake your phone up when it is asleep.

Bottom Speakers

Messages: You can find your text messages here.

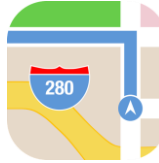

Clock: You can set alarms, timers, and use a stopwatch.

App Store: You can purchase and download additional applications on your device.

Photos: All pictures taken on your device can be found here. You can also save pictures sent to you to your photos and create albums to organize them.

Maps: You can get directions and see a map of the area around you in this app.

Phone: Access your contacts and make phone calls here.

Weather: You can check the weather in your current location.

Notes: You can take notes here.

Camera: Here you can access the front and rear cameras on your phone in order to take pictures.

Calendar: You can find the current date as well as a year long calendar. You can also mark this calendar with upcoming events.

Safari: Here you can browse the internet and access various websites.

Facetime: By using Facetime, you can call people and see them as you speak.

iPad Basics

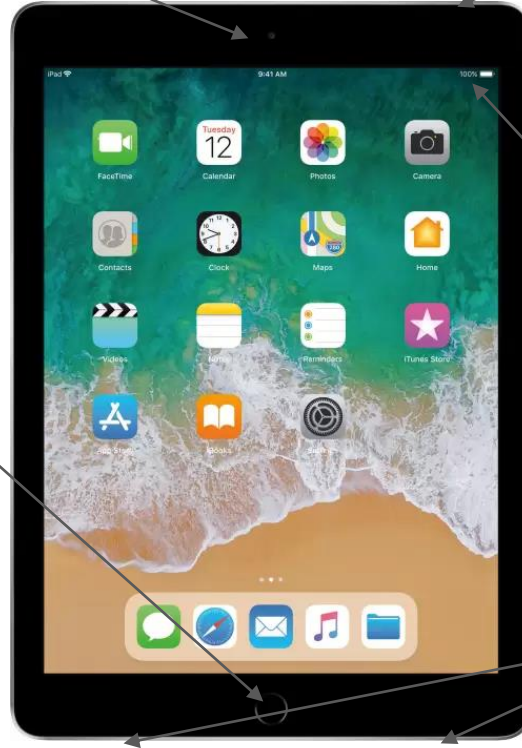

Front Camera
*Used when on
facetime or
taking selfies.

Power button
*If you press and
hold the button,
the screen will go
dark and at the top
it will say slide to
shut down.

Volume Buttons

Home Button
*Pressing this will bring you
back to your home page (the
screen in the picture above) at
any time. It will also wake
your iPad up when it is asleep.
On newer iPads, touch ID can
be enabled so that you can use
your fingerprint to open the
device rather than putting in
the passcode.
